Response to Amendment

1. In light of further review of the instant application new grounds of rejection follows:

2. Claim 8 is objected to because of the following minor informalities:

In line 11, "(I)" is typographical error. It should be corrected to -- (i)--.

In line 14, "...for at least the plurality of switch planes,..." should be replaced with --...for at least **out of** the plurality of switch planes, ...-- . Appropriate correction is required.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

3. A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-5 and 8-14 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-5, 8-14 of copending Application No. 09/333,218. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 2667

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

~~ALREADY ADDRESSED~~

Claims ~~5-6~~ are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims ~~5-6~~ of copending Application No. 09/400,927. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 6 of the instant application merely broadens the scope of claim 6 of the application 09/400,927 by eliminating the element and its function of the claim.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
